

At-Home Printing with Platinum Tiara

1. Use the measurements of the card to set up your document size.

2. To set your margins, you will need measure from the edges of the card to the beginning of the printing space. Enter the measurements in the margin area on the page setup.

3. Select portrait or landscape in the paper orientation to suite the graphic or shape of the card.

Now you are ready to type your text. For most invites, text is centered in the print area.

Before printing on your invitations, we suggest creating a test sheet with the same measurements as your card to print on.
